Forecast for Friday 08 Nov 2024

Weather: Cloudy and overcast overnight and early morning with mist, fog and occasional drizzle. The cloud tending to lift and break during daylight hours, some bright or sunny spells developing, these most likely across Yr Wyddfa and the north during the afternoon. Cloud then increasing and lowering again in the evening. There is a marked temperature inversion due to the dominant high pressure system. This means that some of the higher summits could be cloud free, but details around this are uncertain.

Chance of cloud-free hill tops above 800m: 10% becoming 50% by afternoon.

Low Cloud and visibility: Extensive low cloud, this well down early and late in the day, but lifting during daylight hours and could clear at times by afternoon, particularly in the north of the park. Visibility moderate to very poor at first, but becoming mostly good during daylight hours except in cloud.
